

How to install authenticator on a mobile phone

For iPhone (iOS)

1. Open the **Apple App Store**.
2. Tap the search icon and type "**Authenticator**".
3. Select your preferred app from the results (this can be Authenticator, Google Authenticator, Microsoft Authenticator and so on)
4. Tap **Get** and use Face ID, Touch ID, or your password to confirm.

For Android

1. Open the **Google Play Store**.
2. Tap the search icon and type "**Authenticator**".
3. Select your preferred app from the results (this can be Authenticator, Google Authenticator, Microsoft Authenticator and so on)
4. Once downloaded, tap **Open**.

How to confirm you are downloading the right application

The icons for the authenticator apps look like the below:

Authenticator App | **Google Authenticator** | **Microsoft Authenticator**

Now you are ready to set up MFA for the Protection Platform

Now that you have downloaded the correct authenticator app, you can follow our instructions [here](#). Or watch our helpful video on this [page](#).
